FACTS

The Newport 1000c is available in DC and AC Voltages. Systems use motor speed control technology, allowing for quiet operation on an inverter or straight off the battery bank. Multi-speed capacity allows the machine to operate at its' optimum speed in all conditions. The system will automatically switch to low mode to extend the prefilter life in challenging feed water. The Spectra Connect allows you to operate and monitor your watermaker from a remote device, and has new added features like the Fill Tank mode, or a customizable Auto Run mode, One-Touch Sensor Calibration, and suggested maintenance intervals displayed on the dashboard.
